

## IC REALTIME PSS SOFTWARE

Utilizing IC Realtime's IC Online Software you are able to connect to hundreds of separate IP addresses simultaneously. With 121 individual viewing windows you can bring up 121 individual sites at once and review live and recorded data from each site at the same time. Full PTZ control and two way audio are also at your fingertips, allowing for full control from anywhere in the world.

### MAIN FEATURES

- Multiple IP and devices supported. It can manage multiple DVRs, video servers, IP cameras, decoders and other network product connections allowing monitoring, PTZ control, DVR configuration and DVR playback.
- E-map supported. Our CMS software has a device tree combined with an EMAP which makes finding cameras easy
- Supports decoders to realise the virtual matrix system and video wall
- Monitoring plan supported. You can set individual plans for each site or even bring multiple sites together and set a time for it to start every day.
- Network configuration and upgrade. You can configure the setting of each device and update the software on your DVR directly from the remote software
- Scheduled network backup. Allows you to record data from sites at specified times every day.
- Bi-Directional audio supported for each individual site.
- Set channel name's and set individual color setting for each camera directly from the user panel.
- Automated audio responses to critical events such as loss of connection, video loss and automatic motion detection pop-up
- Programs configuration incorporates a 'Self-Diagnostic Health Report' that can provide information on device status, systems faults, etc
- Easy intuitive systems to use with full technical support provided by company representatives 'on line'

\*Performance of the IC Online software is dependent on network and PC Configuration.

IC Realtime has successfully developed a 'user-friendly' suite of software products for our business partners and their clients.

These programs facilitate the remote access, interrogation and functional control of integrated CCTV Security systems over internet or through the medium of mobile phone, iPhone, iPad. With in excess of 50 different manufacturers of phones and PDA's supported, the IC Online software offers incredible flexibility, enhanced levels of security and an immediate incident response platform. IC Realtime's software programs are renowned for ease of installation and navigation. They deliver extremely high quality video image transmission in a real-time format.

The IC Online software is capable of managing multiple connections from any matrix of ICRealtime DVR systems and from one to multiple sites.

The IC Online software has the capacity to store up to 500 different camera locations and has the ability to concurrently connect and display 121 different IP addressed DVRs on a single screen platform.

In addition, IC Realtime DVR's are configured to be able to generate direct signal transmission to Alarm Receiving Centers (ARC's) over the Sentinel Plus software program.

## ICRSS SMART PHONE SOFTWARE

### Description

IC Realtime's ICRSS offers surveillance solutions for virtually every situation. Whether you're a homeowner who just wants to check up on the home while away, a store owner who would like to monitor all aspects of your business at all times, or a proprietor of a large enterprise who would like to have organized video surveillance from all of your cameras. IC Realtime has a solution that will save you time and money and give you peace of mind.

How can IC Realtime save you money and make your home or business more intelligent? In many cases IC Realtime mobile software is compatible with your existing infrastructure or, at least, it can be made to be compatible which will save you countless hours and money that you would otherwise have to spend on new equipment or on running new cable throughout your home or business.

IC Realtime mobile software is integrates with major cell phone and PDA manufacturers such as Apple (iPhone (iOS4 Tested), iTouch & iPad),

Motorola, Nokia, BlackBerry (RIM), Sony-Ericson, HP, LG, Samsung and HTC and supports over 500 different models. IC Realtime mobile software is a carrier class product, tested and passed with leading cell phone carriers such as Vodafone, O2, Meteor, 3, AT&T, Verizon Wireless, Sprint/Nextel, T-Mobile and Orange.
